

In recognition of
Brain Awareness Week,
March 10 – 16, 2025

**The Centre on Aging
and Health Presents:**
ROBOT AND FRANK
**FOLLOWED BY DISCUSSION
WITH THE AUDIENCE**

Robot and Frank (2012) is a critically acclaimed Sundance Award-winning film about dementia and technology, starring Frank Langella and Susan Sarandon. In this compelling and humorous sci-fi drama set in the near future, a son purchases a robot butler to support the care of his aging ex-convict father who is experiencing dementia and cognitive decline. However, when his father discovers that the robot cannot decipher between legal and illegal activities, he begins to use the robot to commit heists together.

Discussant: Dr. Thomas Hadjistavropoulos, Research Chair in Aging and Health and Professor of Psychology, University of Regina

Discussion: Dr. Thomas Hadjistavropoulos will lead a discussion with the audience on the potential role of technology in improving the quality of life for people with dementia.
